NOTE: Items #9 and #10 Usually require templates supplied by customer

## Rimac Facilities

Our factory is fully equipped with CNC equipment to handle all curving requirements. As well, we have a full service machine shop and foundry within our facility allowing us the flexibility to manufacture required tooling on site. This saves our customers time and money.

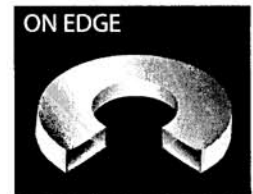

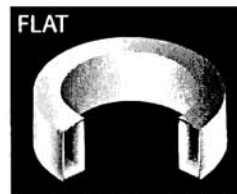

We also have an in-house carpentry facility which custom builds shipping crates for each job. Our business office is fully computerized, offering our customers the ability to communicate with us electronically - sending and receiving templates and auto-cad plotted material within minutes. We also host a comprehensive web site located at [www.metalcurving.com](http://www.metalcurving.com)

## Comprehensive Quotations

Rimac prides itself on creating the most comprehensive quotes in the industry. Our quotes can be provided in Canadian or US dollars. They include detailed material requirements, delivery and shipping details and expected lead times. There are no surprises at the end of a Rimac job.

## Direction of Curve

## Tubes

## Angles

## Channels
